Overview of "Boston" Dataset from "MASS" Package

Julian Hatwell

January 19, 2016

This document provides a brief overview of the Boston dataset in the MASS R package.

```
##       crim                zn              indus            chas

```

From the summary, and the associated help (not shown), the following observations can be made:

The dataframe contains 506 rows and 14 columns.

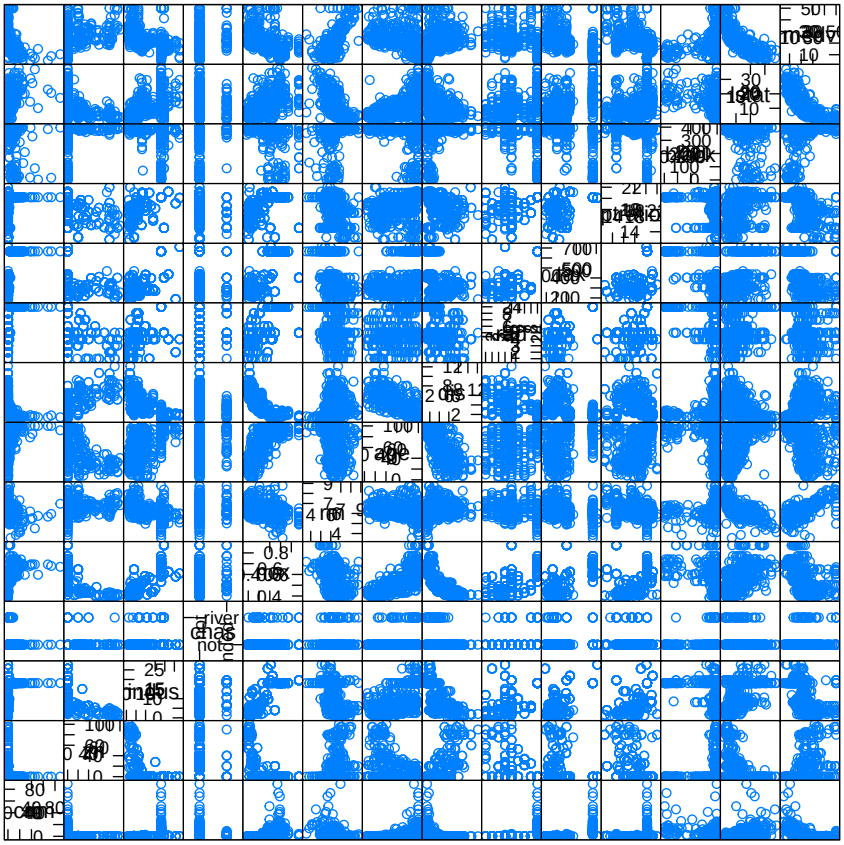

Figure 1: multi-variate comparisons

```
##
##  Welch Two Sample t-test
##
## data:  crim by chas
## t = 3.2224, df = 120.42, p-value = 0.001636
## alternative hypothesis: true difference in means is not equal to 0
## 95 percent confidence interval:
##  0.7298305 3.0557226
## sample estimates:
##           mean in group not mean in group river bounded
##                    3.744447                    1.851670
```
